

About Quickbooks

QuickBooks is a line of business accounting software developed and marketed by Intuit.

About QBNav

QBNav is an add-on developed by Leaping Frog Solutions Pvt. Ltd. QBNav is nothing but a connector which connects a QB database to NAV database for the purpose of data transfer

QBNav Highlights

- **Version Independent:** Integration possible between all and any version of Quickbooks to all and any version of Navision.
- **Real Time:** Integration in real time, either manually or automated.
- **GUI Independent:** GUI (Graphical User Interface) – ON & OFF independent. Transfer of data can also happen in SILENT mode where Quick books does not have to be running.
